

I understand how private companies want to conduct business by disrupting me in the privacy of my home, but under no circumstances do I support this initiative. It is important for our politicians to receive our support and for them to represent US in government. Do NOT allow anyone to circumvent the "no call" rules; to do so will force me to make different chose at the next election. I will personally make sure anyone I know, my family, kids, future grand children never vote for the current administration. I hope I make it very clear how much I do NOT want this to happen. I have enjoyed the tranquility of my home and it will not any disrupt that for monetary gain.
